Professional Summary

Experienced IT professional, senior Full-Stack Developer & Team Leader, with **15+ years** in software development, data systems design, and digital transformation. Expertise in full-stack web development with **.NET, C#, ASP.NET Core, SQL Server, TypeScript, and React**. Delivered **20+ enterprise-grade applications** for NGOs, universities, and government institutions. Proven track record in **leading multidisciplinary teams**, enhancing reporting accuracy, and **implementing automation solutions** that significantly streamline administrative processes. Passionate about designing practical, data-driven systems that drive efficiency and informed decision-making.

Education

- Master's in Web Science – Syrian Virtual University (2023 – Present)
- Bachelor's in Computer & Automation Engineering – Damascus University (2006 – 2012)

Professional Experience

Team Leader - Contract type: *full time [On-Site]*

Company: Pro S (Startup) [pro-sss.com] – Damascus, Syria [2020 – Present]

- Led development and deployment of tailored IT solutions.
- Supervised a small developer team and delivered more than 10 operational systems supporting automation, workflow, data management, reporting, and related business functions.

Information Management Officer - Contract type: *consultancy [On-Site]*

Company: Syrian Society for Social Development (SSSD) [sssd-ngo.org] [2012 – Present]

Developed and implemented integrated IT systems for beneficiary data management, internal automation, and data analytics, including:

- **Community Center Management System:** Serving 100+ centers and 1.5M+ beneficiaries.
- **ERP Platform (Microservice System):** Automated HR, finance, projects, and procurement workflows across 6+ departments, supporting operations for 1500+ staff and 3000 volunteer and improving process speed, accuracy, and minimizing errors to a very low rate.
- **Humanitarian Data Hub:** Developed a centralized data hub to unify humanitarian response data, leveraging AI tools for advanced data analysis, information extraction, and enhanced decision-making.

Web Developer - Contract type: *constructor [Remotely]*

Company: Antiochian House of Studies – CA, USA [ahos.edu] [2022 – Present]

- Developed and maintained the website and content management system for 300+ students, managing over 800 daily visits, and implemented automated workflows to streamline key departmental processes.

Freelance Software Developer – work type: *freelance [On-Site or Remotely]*

Company: Many Companies [2008 – Present]

- Delivered 15+ custom applications for NGOs, ministries, and educational institutions.
- Specialized in HR, payroll, and legal systems supporting hundreds of users.
- Provided long-term maintenance, technical consulting, and capacity-building services.

Computer Science Lecturer work type: *Part-time [3 hours per week]*

Company: Damascus University [2013 – Present]

- Lectured and conducted labs in programming, databases, networks, Java, C++, etc.

Core Competencies and Skills

Tech Stack (Full-Stack & Backend)

C#, ASP.NET Core, Entity Framework, SQL Server, T-SQL, Stored Procedures, Database Design, Data Modeling, Query Optimization.

Front-End & Client-Side

React, JavaScript, TypeScript, Razor Pages, Bootstrap, HTML5, AJAX.

Tools, DevOps & Data

Docker, Kubernetes, Git, GitHub, Visual Studio, Swagger, Postman, Power BI, Tableau, WordPress, Figma.

IT Infrastructure & Networking

Windows Server, Active Directory, LAN/WAN, Firewalls, VPN, CCNA, CCNP, MCITP.

Project & Workflow Management

Team Leadership, Agile Methodologies, Workflow Optimization, KPI Systems, Dashboards, Automated Processes.

Languages

Arabic (Native), English (C1), German (A2).

Key Projects

- **AI-Powered Humanitarian Decision System** (2024–ongoing) – Deep learning solution to improve humanitarian response (*Python, C#, Deep Learning, Power BI*).
- **Earthquake Relief Workflow System** (2023) – Developed a rapid-deployment web tool for national crisis coordination, used by government agencies (*.NET Core, React, SQL, Docker*).
- **Community Data Management System** (2013–present) – Core NGO tool managing 1.5M+ beneficiary records and service data (*Window form, Migrated/Modernized to .NET Core/React, SQL, Docker*).
- **ERP Platform** (2020–present) – A microservices system that connects multiple departments, automating processes, significantly saving time, and reducing errors to a minimal level (*.NET Core, Microservices, Docker, SQL, React*).
- **KPI Dashboards** (2020–2021) – Built for NGOs and ministries to visualize performance (*ASP.Net, Power BI, Tableau, SQL Server*).
- **Legal Support & Finance Workflow** – Systems for tracking legal services and NGO finance workflows (*C#, ASP.NET Core, SQL Server*).
- **Library & Archive Systems** – Built for religious and educational institutions.

And Many more...
